Trans. of unidentified French? article, n. p., n. d.

DESCRIPTORS: *Electrostatics, *Storage tubes,
*Image tubes, Design, Operation, Electron tubes.

The author first shows the place occupied by the various electrostatic memory tubes in the general classification of image tubes. The article then comprises a first general section restating the principles of an electrostatic memory, together with the fundamental processes regarding the deposition of electric charges on an insulator by means of a fine electron beam. In the second section, the various types of memory tubes already developed are passed in review (Engineering-Electronic, TT, v. 10, no. 4) (over)
